

JUKEBOXES

The Jukeboxes come with a range of music from the 50s thru to the latest which is updated each month with the latest top 20 hits. The karaoke jukeboxes are supplied with 2 microphones. They will play songs at random if the customer has not chosen any, they can also choose a category e.g. 60s, 70s, heavy rock, easy listening music etc.

Video/Karaoke/Jukebox machines have a further 2300 video clip songs which display the clip of the song being played. The karaoke function in this jukebox is the type you would normally see in the pubs and clubs, where the words appear on screen and change colour as they are to be sung with no main artist only the background singers where required.
